OnsiteDiagnostics
For a safer workplace

COVID-19 Rapid Antigen Workplace Screening Test Course
Collection, Usage, Interpretation and Reporting.

What is the purpose of the Training Course?

Onsite Diagnostics' *COVID-19 Rapid Antigen Workplace Screening Test Course* has been developed to assist workplaces, schools and institutions to conduct Covid-19 Rapid Antigen testing in a safe, accurate and legal manner to minimise the potential of a Covid outbreak.

Previously workplaces were required to have a Health Practitioner carry out/oversee the testing. With the approval of the Covid-19 Rapid Antigen Self-tests workplaces, schools and other institutions are now able to test their employees and site attendees using TGA approved Covid-19 Rapid Antigen Self-tests.

Where may Rapid Antigen Testing be used?

Covid-19 Rapid antigen testing is designed to be done in a range of sites including non-clinical and clinical settings such as construction sites, educational institutions, fixed and temporary community-based sites, aged care residential facilities and commercial businesses such as food production sites. Industries and schools can implement rapid antigen testing screening.

In this training module we teach general procedures for how to implement a program, how to set-up your test site, how to correctly use a Covid-19 Antigen testing device, how to interpret test results and report them to the authorities required under law.

The unit *COVID-19 Rapid Antigen Workplace Screening Test Course* is a comprehensive pathology based training course provided in layman's terms, available via distance/online learning.

What Employment Pathways are available?

Employment pathways include performing Covid-19 Rapid Antigen Testing at mine sites, transport depots, large industrial sites, medical centres, schools and other workplaces or environments where the need for Covid-19 Rapid Antigen Screening has been identified as a Workplace Health and Safety requirement.

What is the course content?

The learning program is designed to ensure correct procedures are followed when performing Covid-19 Rapid Antigen Screening, and specifically covers:

1. Introduction
2. Types of Covid-19 Tests Available
3. Current Legislation
4. Who may perform the testing
5. Workplace testing basics
6. Documentation required
7. How to set-up your testing site
8. How to perform a Clinical Test
9. How to perform a Self-Test
10. Test Integrity and Privacy
11. Post-test requirements for positive tests
12. PCR testing requirements

Where is the training conducted?

In order to allow flexibility and convenience for work-places and their employees we offer this course via distance learning. You will have access to a trainer/assessor over the phone who will assist you with any questions you have during your training. There is no classroom component required.

A comprehensive training pack will be sent to you which includes Covid-19 Antigen testing equipment, student workbook and access to our online training and assessment portal.

What are the course fees and duration?

Distance Learning $475 per person - 3-4 hours of private study.

Study at your own pace, complete the online modules, your online assessment and practical assessment in your own time. Then send your assessments to us for marking online and via email.

Our trainers/assessors will mark your assessment within 24 hours.

On completion of the course, participants will be issued with a 'Certificate of Attainment' allowing them to work as Covid-19 Rapid Antigen Test Collectors in a workplace/school environment.

Call 1300 667 107 for further enrolment information.
